

PRANAJIT DAS

Kolkata, West Bengal, India | daspranajit973@gmail.com [LinkedIn Profile](#) | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Purpose-driven AI and software development student with a proven track record of building intelligent, real-world systems. Highly skilled in machine learning workflows, cloud infrastructure deployment, and generative AI applications. Experienced team leader with demonstrated success in competitive technical hackathons, including winning 1st place out of 250+ participants in the AWS Cloud Quest. Seeking a technical internship to apply LLM prompt engineering, AI development, and software engineering skills to scalable, impactful solutions.

TECHNICAL SKILLS

- **Languages & Core Concepts:** Python (Data Structures), Java, Computer Architecture
- **AI & Machine Learning:** Generative AI, Large Language Models (LLMs), Basic Prompt Engineering, NotebookLM, Dify, Model Training
- **Cloud & OS:** Amazon Web Services (AWS), Linux, GitHub
- **Soft Skills:** Agile Team Leadership, Technical Communication, Cross-Functional Collaboration, Rapid Problem Solving

EDUCATION

Techno India University — Kolkata, India *Bachelor of Science (B.Sc.) in Generative AI* | [Expected Graduation Month/Year]

- **Relevant Coursework:** Machine Learning Model Architectures, Python Programming, Cloud Computing Systems, Digital Electronics, and Computer Architecture.

EXPERIENCE

Techno Billion AI | Virtual AI Intern *Project: DrainMind – Smart AI Drain Health Monitoring System*

- Researched and built a technical framework for a smart urban infrastructure tool mapped to UN SDG 11 (Sustainable Cities and Communities).
- Designed predictive pipelines simulating sensor arrays to send automated early alerts to civic authorities, aiming to prevent urban flooding.

KEY PROJECTS & ACHIEVEMENTS

NeutroBot — Smart Nutrition Tracking Application | *AWS Cloud Quest Project Winner*

- **Awarded 1st Place out of 250+ participants** by the AWS Student Builder Group for exceptional cloud implementation.
- Engineered and launched an open-source, full-stack nutrition tracking application to help users monitor dietary habits and manage wellness metrics.
- Architected and deployed backend application services seamlessly onto AWS cloud infrastructure, achieving AWS Cloud Quest Tier 4 certification.

Sandbox CCU Edition 2 | *Top 30 Team Leader (Technical Innovation Track)*

- Led a fast-paced development team through a highly competitive, high-pressure problem-solving hackathon track.

- Managed sprint task delegation and technical execution, successfully securing a spot among the Top 30 teams in the competition.

AI for Sustainable Development Prototype | *Project Presenter (National Technology Day)*

- Conceptualized and prototyped an AI-driven system addressing critical sustainable development milestones.
- Presented the solution to external industry experts, receiving a Certificate of Presentation from the Institution's Innovation Council (IIC) and IQAC.

Arsenic Shield | *Project Developer (Academic Research Initiative)*

- Designed an AI-driven prototype solution to identify and combat local environmental arsenic crises.
- Synthesized complex insights into high-impact visual presentations for university evaluation.

CERTIFICATIONS & WORKSHOPS

- **Gemini Certified Student & Student AI Masterclass** — *Google for Education AI Implementation Program*
 - Mastered structured, multimodal AI problem-solving workflows linking text, images, and codebase logic. Developed expertise in LLM system design and automated knowledge synthesis.
- **AI Tools Certification** — *Be10x Professional Workshop*
 - Acquired advanced techniques in AI-assisted code optimization and accelerated debugging strategies.
